

HW8

7.1

$$\begin{aligned}
 & \text{if and only if} \\
 & (R_1 \wedge R_2 = R_1) \text{ OR } (R_1 \wedge R_2 = R_2) \\
 & R_1 = (A, B, C) \\
 & R_2 = (A, D, E) \\
 & R_1 \wedge R_2 = A \\
 & A \rightarrow BC \Leftrightarrow A \rightarrow B, A \rightarrow C \\
 & A \rightarrow B, B \rightarrow D \Leftrightarrow A \rightarrow D \\
 & A \rightarrow CD \Leftrightarrow A \rightarrow D, A \rightarrow C \\
 & A \rightarrow CD, CD \rightarrow E \Leftrightarrow A \rightarrow E \\
 & A \rightarrow E, E \rightarrow A \Leftrightarrow A \rightarrow A
 \end{aligned}
 \tag{1}$$

So A is a candidate key and it's a lossless - join

7.13

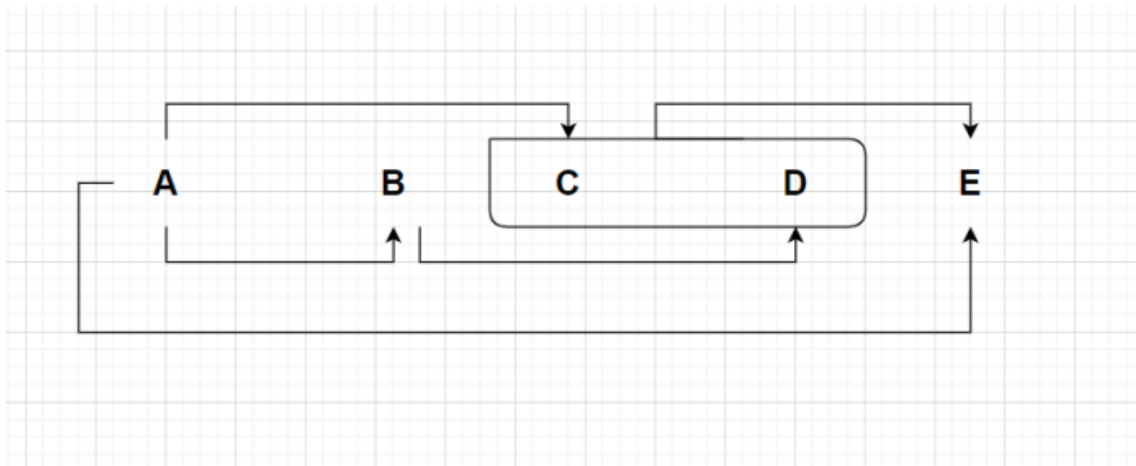

$$\begin{aligned}
 & B \rightarrow D \text{ is not preserved} \\
 & \text{the restriction of } (A, B, C) \text{ is} \\
 & A \rightarrow B \quad A \rightarrow A \quad A \rightarrow C \\
 & B \rightarrow B \quad C \rightarrow C \\
 & \text{the restriction of } (C, D, E) \text{ is} \\
 & C \rightarrow D \quad C \rightarrow C \quad C \rightarrow E \quad D \rightarrow D \quad D \rightarrow E \\
 & \text{so it's impossible for } B \rightarrow D
 \end{aligned}
 \tag{1}$$

7.21

$$\begin{aligned}
 & A \rightarrow BC \\
 & CD \rightarrow E \\
 & B \rightarrow D \\
 & (A, B, C)(B, D)(C, D, E)(E, A)
 \end{aligned}
 \tag{2}$$

7.22

$$\begin{aligned}
 A &\rightarrow BC \\
 CD &\rightarrow E \\
 B &\rightarrow D \\
 (A, B, C) & (B, D) (C, D, E) (E, A)
 \end{aligned} \tag{3}$$

7.30

a.

$$B^+ = ABCED \tag{3}$$

b.

$$\begin{aligned}
 A &\rightarrow BCD \quad A \rightarrow A \\
 BC &\rightarrow DE \\
 \therefore A &\rightarrow ABCDE \\
 \therefore AF &\rightarrow ABCDEF
 \end{aligned} \tag{4}$$

c.

$$\begin{aligned}
 A &\rightarrow BCD \iff A \rightarrow B \\
 A &\rightarrow B, B \rightarrow D \iff A \rightarrow D \\
 \therefore A &\rightarrow BCD \implies A \rightarrow BC \wedge B \rightarrow D \\
 \therefore BC &\rightarrow DE \implies BC \rightarrow E \therefore B \rightarrow E \\
 \therefore &\begin{cases} A \rightarrow BC \\ B \rightarrow DE \\ D \rightarrow A \end{cases}
 \end{aligned} \tag{5}$$

d.

$$\begin{aligned}
 r_1 &\{A, B, C\} \\
 r_2 &\{B, D, E\} \\
 r_3 &\{D, A\} \\
 r_4 &\{A, F\}
 \end{aligned} \tag{6}$$

We could add a rule $A \rightarrow F$ to make it good

e.

$$A \rightarrow BCD \implies \begin{cases} r_1 \{A, B, C, D\} \\ r_2 \{A, E\} \\ r_3 \{A, F\} \end{cases} \tag{7}$$
